

## INSITE CLOUD BASED SOFTWARE

### PEACE OF MIND DELIVERED RIGHT TO YOUR DEVICE.

The InSite cloud based software provides real-time, critical data from concrete sensors.

Monitor mass pours for essential temperature threshold information. Evaluate key strength targets on up-to-the-minute maturity readings, giving you the confidence of knowing what is happening with your concrete at any moment.

All alerts are delivered via email or text, putting you in control to deliver faster, safer concrete.

### KEY BENEFITS

- 

**Build Faster**
- 

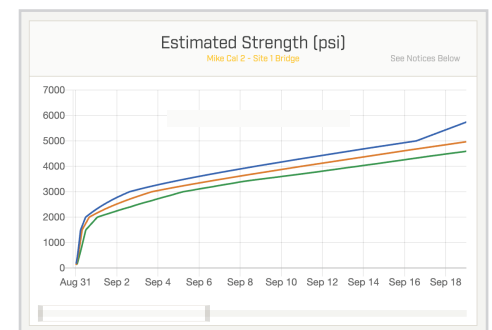

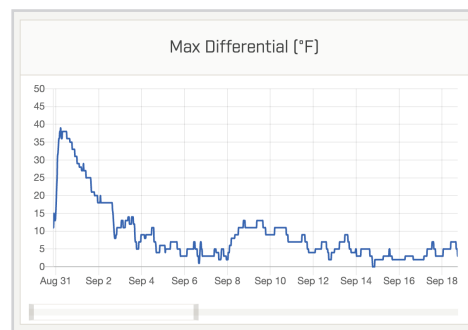

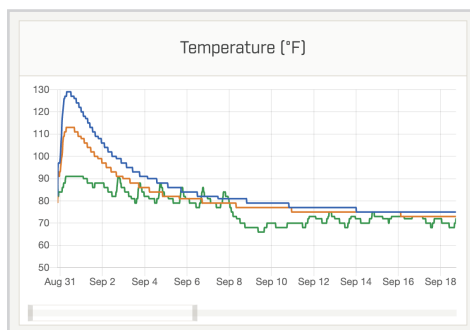

**Build Safer**
- 

**Decrease Costs**
- 

**Meet Specifications**

## INSITE CLOUD BASED SOFTWARE SPECIFICATIONS

<b>Interface/Security</b>	Data pushed to cloud over HTTPS/SSL on port 443
<b>Collaboration</b>	Role-based access to view and modify calibrations Email and SMS notifications for system alerts
<b>Integration</b>	API availability
<b>User Access &amp; Permissions</b>	Hashed user passwords in database
<b>Storage</b>	Virtually unlimited
<b>Scalability</b>	AWS cloud infrastructure - can be scaled upon demand
<b>Compatibility</b>	Desktop and mobile devices
<b>Support and Maintenance</b>	Customer support availability: Tier 1 from sales manager, Tier 2 from design engineers
<b>Alerts</b>	Unlimited customizable alerts for temperature and strength thresholds
<b>Recovery</b>	Backed up daily, tested monthly
<b>Cost</b>	FREE - no hidden costs

Readings shown from three different loggers represented in orange, blue and green.
